

STRATA SOFTWARE GROUP

A MENU OF

Health Services

EHR · TELEHEALTH · CLINICAL AI · COMPLIANCE

For private practices, clinics & specialty groups

VOLUME

No. 01 / 2026

ESTABLISHED

Mississippi · 2025

PREPARED BY

James Walton

Patient-Facing & Clinical Software

SECTION ONE

Things we build.

HIPAA-compliant from the first commit. BAAs in place with every vendor. Encrypted at rest and in transit, audit-logged, ready for an OCR audit on day one.

i. Patient-Facing

HIPAA-Compliant Practice Website

Provider bios, condition pages, medical schema, secure contact forms, accessibility (WCAG 2.1 AA).

\$1,350 +

Patient Portal

Secure intake, document upload, e-signature, messaging, records access, insurance card capture.

\$4,650 +

Telehealth Platform

WebRTC video, scheduling, consent, in-visit notes, payment. BAA-covered infrastructure.

\$6,000 +

Online Booking & Scheduling

Provider availability, appointment types, reminders via SMS/email, no-show flow.

\$1,000 +

Patient Check-In Kiosk

iPad / tablet self check-in. Demographics, consent, copay capture, ID & insurance scan.

\$1,650 +

ii. Clinical & Internal

Custom Clinical Software

Specialty-specific workflows, charting helpers, registries, internal portals.

\$6,000 +

Patient Mobile App

iOS & Android. Records, messaging, telehealth, refill requests. App Store submission included.

\$9,350 +

Provider & Admin Dashboards

Schedules, charts pending, AR aging, no-shows, productivity. Single source of truth.

\$4,350 +

UI / UX Design

Standalone clinical UX, prototyping, design system. Accessibility-first.

\$2,000 +

Specialty Note Templates

Custom SOAP / H&P / procedure note templates inside your EHR. One-time build per specialty.

\$1,000 +

SECTION TWO

Things we connect.

FHIR R4, HL7 v2, SMART on FHIR. Real engineering for the systems that actually run a practice — not a Zapier shim.

iii. EHR & Practice Management

EHR Integration

Epic, Athenahealth, eClinicalWorks, DrChrono, AdvancedMD, NextGen, Valant, Practice Fusion.
 FHIR / HL7 / SMART on FHIR.

\$6,000 + per system

Practice Management Integration

Scheduling, demographics, billing sync. Two-way where supported, one-way mirrors elsewhere.

\$4,350 +

E-Prescribing (Surescripts)

EPCS-ready setup, two-factor, formulary checks, refill workflow.

\$1,650 +

Patient & Chart Data Migration

Historical records, attachments, signed notes. PHI-safe transfer with full audit trail.

\$1,000 +

Imaging / PACS Integration

DICOM ingest, viewer embed, image-result attachments to encounter notes.

\$2,650 +

iv. Clinical & Financial Systems

Insurance Eligibility & Verification

270/271 eligibility, real-time benefits check at booking. Availity, Change Healthcare, Office Ally.

\$2,650 +

Lab Integration

Quest, LabCorp, regional labs. HL7 ORM/ORU orders & results into the chart.

\$2,650 +

Billing & RCM Integration

Claim scrubbing, ERA/EOB ingestion, denial workflows, AR aging dashboards.

\$1,650 +

Payment Processing (HIPAA-Safe)

Stripe Health, card-on-file, patient statements, payment plans. No PHI in payment metadata.

\$1,000 +

Wearables & Remote Monitoring

Apple Health, Fitbit, Dexcom, BP cuffs. RPM data ingestion with thresholds & provider alerts.

\$2,650 +

BAA-COVERED. Every integration ships with executed Business Associate Agreements, documented data flows, and audit-log retention defined before code goes to production.

SECTION THREE

Things that **save time.**

Documentation that writes itself. Triage that runs after hours. Models you own — fine-tuned on your specialty, not a generic chatbot wearing a stethoscope.

v. Clinical AI

AI Medical Scribe

Ambient encounter capture, SOAP-note generation, EHR write-back. Per-provider licensing or owned deployment.

\$6,000 +

Clinical Documentation AI

SOAP, H&P, discharge summaries, ICD-10 / CPT suggestions. Reviewed by provider before sign-off.

\$8,000 +

Custom-Trained Healthcare Model

Fine-tuned for your specialty on your data. Owned by you, hosted privately, BAA-covered.

\$10,650 +

Patient Triage Chatbot

Symptom triage, scheduling assist, after-hours intake. Escalation to on-call provider.

\$3,000 +

Pre-Visit Chart Prep AI

Reads chart, summarizes recent encounters, surfaces care gaps. Saves 5–10 min per visit.

\$3,350 +

Document & Fax OCR

Inbound faxes, intake forms, insurance cards. Auto-classified, indexed, attached to chart.

\$2,350 +

vi. Workflow Automation

Intake-to-Scheduling Automation

Form → insurance check → eligibility → scheduled visit. No double entry.

\$1,650 +

Recall & Follow-Up System

Annual visits, lab follow-ups, treatment adherence. SMS/email/voice with consent tracking.

\$1,000 +

AI Phone Triage & Voice Agent

HIPAA-compliant voice AI for after-hours triage, prescription refills, appointment requests.

\$2,650 +

Reporting & Analytics

Productivity, AR aging, no-show, panel-health. Drill-down dashboards on top of EHR data.

\$1,650 +

Prior Authorization Automation

Auto-fill payer forms, status polling, denial routing. Cuts hours of staff time per week.

\$2,350 +

No-Show Prediction

Per-patient no-show risk scoring. Drives reminder cadence & double-book decisions.

\$1,650 +

Hardware, Networks & HIPAA

SECTION FOUR

Things we **harden**.

The clinic floor matters as much as the cloud. Workstations that don't fight the front desk, networks that pass an audit, and a paper trail to prove it.

vii. Clinic Infrastructure

Front-Desk & Exam-Room Workstations

Built to spec, full-disk encryption, screen-lock policy, antivirus, automated backup. Parts at cost.

\$650 + per unit

HIPAA-Compliant Network Setup

Segmented VLANs (clinical / guest / IoT), business-grade firewall, audit logging, VPN for telework.

\$1,000 +

Secure Data Migration

PHI-safe transfer, chain-of-custody documentation, secure-wipe certificates for retired drives.

\$1,000 +

On-Site IT Support

Hourly diagnostics, emergency response, vendor coordination. HIPAA-trained technicians.

\$100 / hr

Backup & Disaster Recovery

Encrypted off-site backup, tested restore drills, documented RTO/RPO. PHI-safe storage.

\$1,000 +

viii. HIPAA Compliance & Audit

HIPAA Risk Assessment

Technical, administrative & physical safeguards review. Written report, prioritized remediation list.

\$650

BAA & Vendor Review

Inventory of every vendor touching PHI, BAA status, data-flow diagram, gap report.

\$650

Policies & Procedures Pack

Sanction policy, breach-notification SOP, access-control policy, training log templates.

\$650

Incident Response & Breach Drill

Tabletop exercise, response runbook, contact tree, OCR-ready documentation.

\$650

42 CFR Part 2 Compliance

Substance-use disorder records — stricter than HIPAA. Consent flow, segmented access, redaction.

\$1,350 +

Annual HIPAA Training

Workforce training, sign-off tracking, refresher modules. Documentation auditors look for.

\$500 / yr

SCOPE NOTE. Strata performs technical & operational HIPAA work — risk assessments, safeguards, audits, remediation. For OCR responses or breach-notification filings we coordinate with your healthcare counsel.

Practices We Serve

SECTION SIX

Practices we know.

Specialty-specific note templates, registries, and integrations included where relevant. We've already done the homework on the workflow, billing codes, and consent stack for each one below.

xi. Primary & Family Care

Family Medicine	Wellness visits, chronic care, immunization registries, school physicals.
Internal Medicine	Annual physicals, chronic disease management, Medicare wellness visits.
Pediatrics	Vaccines, growth charts, school & sports physicals, parent portal access controls.
Geriatrics	CCM/RPM, fall risk, polypharmacy review, caregiver portal access.
Urgent Care	Walk-in flow, fast charting, payer eligibility at the door, occ-med templates.

xii. Behavioral & Mental Health

Psychiatry	Med management, refills, Surescripts EPCS, controlled-substance audit log.
Psychology & Therapy	DSM-5 templates, intake batteries, recurring sessions, outcome tracking.
Substance Use	42 CFR Part 2 compliance, MAT workflows, segmented access, redacted releases.
Group & Couples	Multi-patient encounters, billing splits, consent for shared notes.

xiii. Specialty Practices

OB / GYN	Pregnancy timelines, ultrasound integration, prenatal flowsheet, postpartum recall.
Orthopedics & PT	Range-of-motion charting, post-op protocols, DME orders, return-to-play notes.
Dermatology	Photo capture, lesion mapping, biopsy tracking, cosmetic vs. medical billing.
Dental & Orthodontics	Treatment plans, ortho timelines, imaging, financing & payment plans.
Med Spa & Aesthetics	Consent stacks, before/after photo vault, package billing, membership plans.
Cardiology & Endocrine	RPM ingestion (BP cuffs, CGM, weight), threshold alerts, lab trending.

NOT LISTED? If your specialty isn't here, we'll spend a 30-minute call learning your workflow and quote it from there. We'd rather write specialty-specific templates than ship a generic chart.

SECTION SEVEN

How we work.

Five phases. Each one billed plainly, with a clear hand-off so nothing surprises you. Built like we'd build a job site — permits before drywall, and a paper trail at every step.

xiv. The Five Phases

- 01** **Discovery** WEEK 1
Practice walkthrough, EHR & vendor inventory, BAA review. Workflow shadowing — front desk, MA, provider, billing. Risk register and dependency map written down before a line of code.
DELIVERABLE · *written scope + fixed quote · \$1,000, credited toward build*
- 02** **Design** WEEK 2 – 3
UX wireframes, clickable prototype. Patient journey + provider journey. HIPAA threat model and data-flow diagrams. We sketch the building before pouring concrete.
DELIVERABLE · *signed-off design + technical spec*
- 03** **Build** WEEK 4 – 12
Two-week sprints, demo every Friday. BAA & vendor onboarding in parallel so nothing's blocked at launch. Mid-build security review at 50%. Staging environment with synthetic PHI.
DELIVERABLE · *production-ready system in staging + audit-log retention configured*
- 04** **Launch** WEEK 13 – 14
Staff training — front desk, providers, billing — by role. Cutover plan with rollback path documented. Go-live day on-site or on-call coverage. 30-day hyper-care included.
DELIVERABLE · *live system + trained staff + 30 days of priority support*
- 05** **Support** ONGOING
Strata Care · Health retainer recommended. Quarterly access-review and audit-log review. Annual HIPAA training refresh. Roadmap reviewed every 90 days against what's actually breaking.
DELIVERABLE · *system that doesn't quietly rot*

SECTION EIGHT

Things you can just buy.

Stop scoping line by line. Three bundles, fixed price, fixed timeline. Customize the rest — but for most practices, one of these is the right starting point.

xv. Bundles

Solo Practice Starter

\$9,650

For new or single-provider practices launching in under 60 days.

- HIPAA-Compliant Practice Website with provider & condition pages
- Patient Portal — intake, e-signature, secure messaging, records access
- Online Booking & Scheduling with SMS & email reminders
- HIPAA Risk Assessment + BAA & Vendor Review + Policies Pack
- 90 days of Strata Care · Health support included

TIMELINE 6 WEEKS · SAVE \$1,650 VS À LA CARTE

Multi-Provider Clinic

\$28,000

For 3 – 10 provider practices ready to consolidate vendors and add real automation.

- Everything in Solo Practice Starter
- Telehealth Platform on BAA-covered infrastructure
- One EHR Integration — FHIR / HL7 / SMART on FHIR
- Patient Mobile App — iOS & Android, App Store submission included
- AI Medical Scribe — per-provider licensing for year one
- Provider & Admin Dashboards — schedules, AR aging, productivity

TIMELINE 12 WEEKS · SAVE \$4,650 VS À LA CARTE

Specialty Group

\$52,000

For specialty groups, surgery centers, and DSO/MSO operators with real volume.

- Everything in Multi-Provider Clinic
- Custom-Trained Healthcare Model — fine-tuned on your specialty, owned by you
- Imaging / PACS Integration with DICOM ingest
- Real-time Insurance Eligibility & Verification (270/271)
- Prior Authorization Automation
- 42 CFR Part 2 compliance build (where applicable)
- 12 months of Strata Care · Health

TIMELINE 16 – 20 WEEKS · SAVE \$9,650 VS À LA CARTE

EVERY BUNDLE INCLUDES. Written project plan, weekly demos, 30-day post-launch hyper-care, executed BAAs, audit-ready documentation, and full source-code ownership. No vendor lock to Strata — you can take what we build anywhere.

SECTION NINE

Things under the hood.

What we build with, why we picked it, and exactly what you own at the end. No black boxes, no proprietary lock-in to Strata. Take what we build and run it anywhere.

xvi. Standards & Protocols

FHIR R4	Read & write to modern EHRs. SMART on FHIR for OAuth-scoped, EHR-launched apps.
HL7 v2.x	When the vendor's still on the old rails — ORM, ORU, ADT messages.
DICOM	Imaging ingestion, viewer embed, image-result attachments to encounters.
X12 EDI	270/271 eligibility, 837 claims, 835 ERA — Availity, Change Healthcare, Office Ally.
NCPDP	E-prescribing via Surescripts, EPCS for controlled substances.

xvii. Languages & Frameworks

TypeScript / Next.js	Patient-facing web, portals, dashboards. Edge-rendered, accessible.
React Native (Expo)	iOS & Android apps from one codebase. App Store submission handled.
Kotlin / Spring Boot	Clinical and billing backends where the JVM ecosystem actually pays off.
Python	AI pipelines, OCR, fine-tuning, and data ingestion glue.
Postgres + Redis	Primary data store, caching, queue. Boring on purpose.

xviii. Infrastructure & Security

AWS / GCP	BAA-covered tenants for any service touching PHI.
Cloudflare	Edge, DDoS protection, R2 storage, Zero Trust workforce VPN.
Identity & Access	Okta, Auth0, or Cognito for provider SSO. MFA enforced. SCIM where supported.
Secrets & Encryption	HashiCorp Vault, full-disk & backup encryption at rest, TLS 1.3 in transit.
Monitoring	Datadog or Sentry, with audit-log shipping to immutable storage for retention.

WHAT YOU OWN. Source code, infrastructure-as-code, training data, fine-tuned model weights, documentation, and BAAs are all yours. We hand you the keys, not a subscription.

SECTION TEN

Things people ask.

The questions that come up on every first call. If yours isn't here, send it — we'd rather answer it once for you than dance around it on a sales pitch.

Q. Are you HIPAA compliant?

We sign a BAA, and HIPAA lives in the build itself — encryption, audit logs, access controls, break-glass policies, training. We also do the boring documentation auditors actually ask for: risk assessments, sanction policy, breach SOP, training logs.

Q. Do you support my EHR?

Probably. We've integrated with Epic, Athenahealth, eClinicalWorks, DrChrono, AdvancedMD, NextGen, Valant, Practice Fusion, and others. If yours isn't on the list, we'll quote it after a 30-minute discovery call.

Q. Who owns the AI models you build for me?

You do. Custom-trained models are deployed in your tenant, weights stored in your storage, training data kept under your BAA. You can take them anywhere — we just write good ones.

Q. Can you migrate my data from another vendor?

Yes. PHI-safe transfer with chain-of-custody documentation, secure-wipe certificates for retired drives, and a full audit trail. Migrations are quoted per scope after we've inventoried the source system.

Q. What's a realistic timeline?

Solo practice: 6 weeks. Multi-provider clinic: 10 – 12 weeks. Specialty group: 16 – 20 weeks. Most delays come from EHR vendor BAAs, which we kick off on day one to keep them off the critical path.

Q. Do you handle OCR responses or breach filings?

No. We do the technical and operational HIPAA work — risk assessments, safeguards, audits, remediation, audit-ready documentation. For OCR responses or breach-notification filings, we coordinate with your healthcare counsel.

Q. Do you take equity in lieu of fees?

Sometimes. For early-stage healthtech founders we'll consider a hybrid arrangement. For established practices: cash, terms, and milestones — that's how everyone stays aligned.

Q. What if my staff hates the new system?

We train them, then we hyper-care for 30 days. If a workflow doesn't fit how the front desk actually works, we change it. Adoption is part of the deliverable, not your problem to solve alone.

Q. Where are you based?

Oxford, Mississippi. We work remotely across the US, on-site for launches and as needed for clinic infrastructure work. Travel billed at cost when applicable.

SECTION ELEVEN

Things we believe.

Strata Software Group was started in Mississippi in 2025 by builders who came up the long way — out of construction, government work, and the kind of trades where if your work is bad, somebody calls you the next morning.

xix. What we believe

Healthcare software should be built like a building. Permits before drywall, foundations before paint, a paper trail at every step.

Compliance isn't a checkbox at the end. It's the slab. We pour it first.

AI in clinical settings should be owned by the clinic — not rented from a chatbot company that read about medicine on the internet.

The front desk has more in common with a job-site superintendent than people realize. Both run the day. We design for them.

"It works on my machine" is not a deliverable. We hand off systems with documentation an auditor can read.

xx. What we won't do

We won't store PHI on a vendor that won't sign a BAA.

We won't ship AI that sees a patient before a provider does.

We won't sell you a system you can't take with you.

We won't quote a project we can't actually finish.

xxi. Who's behind it

James Walton, founder, leads engineering. Self-taught builder out of construction, now shipping healthcare software full time. **Mason Glen**, co-founder, leads database architecture and compliance — government backend background, the one who reads the regs before writing the migration.

We work with a small bench of senior contractors — design, security review, healthcare counsel — pulled in by the project, not on the cap table. Small team on purpose. The phone gets answered by the people writing the code.

Marketing, Coverage & Retainers

SECTION FIVE

Things that keep you running.

Patients find you. The phone gets answered. The system you trusted us to build keeps running long after launch day.

ix. Practice Marketing

Local SEO for Medical Practices

GMB optimization, medical schema, condition pages, provider pages, location pages, technical SEO.

\$1,650 +

SEO & Content Retainer

Monthly condition guides, FAQ build-out, link building, monitoring. Clinically reviewed before publish.

\$350 / mo +

Reputation Engine (HIPAA-Safe)

Automated post-visit review requests by SMS/email. No PHI in messaging, opt-in only.

\$1,000 +

Provider Personal Brand

Strategy, scripts, posting workflow for short-form video. Patient-education focused.

\$1,000 +

Patient Email & SMS Marketing

Newsletters, recall campaigns, condition-specific content. HIPAA-safe segmentation.

\$1,000 +

x. Coverage & Retainers

After-Hours HIPAA Receptionist

Nights, weekends, holidays. Triage, scheduling, escalation. US-based, HIPAA-trained, BAA in place.

\$650 + \$200 / mo

Full-Time HIPAA Receptionist

24/7 coverage. Trained on your intake, billing, formulary, and policies.

\$3,000 + \$400 / mo

Strata Care · Health

Hosting, monitoring, patches, small updates & fixes. Quarterly access-review and audit-log review.

\$500 / mo +

Full-Stack Health Partner

Embedded engineering, design, and compliance retainer. Priority queue, monthly roadmap review.

\$1,650 / mo +

Credentialing & Insurance Enrollment

Provider enrollment, CAQH, payer revalidation. Done-for-you, per-provider engagements.

\$350 / provider

All prices in USD. One-time builds quoted in scope; retainers month-to-month, cancel any time. EHR integration pricing varies by vendor & access tier.

READY TO START

Let's build something.
